-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 June 2005.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 13-36 is/are pending in the application.
- 4a) Of the above claim(s) 24-36 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 13-23 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-16 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Zimmer. In regard to claim 13, Zimmer discloses a car wash device comprised of a vessel 1 for holding a liquid, a pump 7 to pressurize the vessel, a brush 16 having a nozzle (see line 61) wherein the nozzle is sealingly connected to a brush hose fitting 11, a hose 8 having a first end fitting detachably and sealingly connected to the fitting 11 and a second end sealingly mated to the vessel (at outlet 9). As the hose 8 is disclosed as being a conventional garden hose, the fitting 11 is matable to both the hose 8 fitting and a high pressure water source fitting (i.e., a house spigot). Lastly a flow control device is present in the nozzle (lines 67-71) whereby the flow control device can be is operable as claimed. In regard to claim 14, the brush has a hollow elongated handle 17. In regard to claim 15, the nozzle is connected to a first end of the handle 17 (the end at which the bristles protrude, see Figure 3) and the fitting 11 is located at a second end of the handle. In regard to claim 16, the flow control device is integral with the nozzle. In regard to claim 19, the flow control device defines a valve for controlling liquid flow through the nozzle.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmer. Although the Zimmer reference does not disclose the specifically claimed pump, it is the Examiner's position that it would have been obvious to one of ordinary skill in the art at the time the invention was made that any well-known pumping mechanism, including the claimed pumps, can be used to pressurize the vessel in the Zimmer device without effecting the overall operation thereof.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmer in view of Waddell. Although the vessel in the Zimmer device does not include a relief valve thereon, attention is directed to the Waddell reference, which discloses another car wash device employing a pressurized vessel wherein the vessel 16 has a relief valve 36 thereon (see column 4, lines 53-54) in order to enable a user to relieve pressure within the vessel. Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide such a relief valve onto the vessel in the Zimmer device in order to enable a user to relieve the pressure within the vessel.

Claims 18, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zimmer in view of Wei (as cited by the Applicant). Although the Zimmer reference is silent as to the structure of the flow control device, attention is directed to the Wei reference which discloses another car washing device wherein the flow control device includes a selector disk 44 which cooperates with detents 423 and includes selectable nozzle shapes 441 thereon (see column 4, lines 32-36) in order to enable a user to select one of a number of spray patterns or pressures. Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ such a flow control structure onto the Zimmer device in order to enable a user to select a particular spray pattern and pressure.

Response to Arguments

Applicant's arguments filed 6/27/05 have been fully considered but they are not persuasive. The Applicant contends that the Zimmer reference is not applicable against claim 13 as it does not disclose a flow control device having low and high pressure positions when the hose is mated to the vessel and a high pressure water source, respectively. It is initially noted that the "high pressure water source hose fitting" is not part of the claimed combination. Accordingly, as discussed supra, the hose 8 of Zimmer is "matable" to a high pressure water source hose fitting (i.e., the hose is matable to a house spigot). Further, Zimmer discloses that the nozzle includes a conventional rotatable nozzle to control the flow (lines 67-71). Accordingly, the nozzle must inherently have at least two positions (i.e., a "high pressure position" and a "low

pressure position"). Due to this structure, the device is operable as claimed, i.e., the nozzle is capable of being rotated to the low pressure position when mated to the vessel and capable of being rotated to the high pressure position when mated to a high pressure water source.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David J. Walczak whose telephone number is 571-272-4895. The examiner can normally be reached on Mon-Thurs, 6:30- 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine Yu can be reached on 571-272-4835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
